

Company Profile

Green Hub

Above All, Beyond Limits

About Our Company

Founded in 2023, Green Hub Company is a pioneering force in the construction sector, aligning with Saudi Arabia's Vision 2030 to drive sustainable development. Our diverse services in project management, logistics, and consultancy are crafted to promote environmental stewardship, social responsibility, and robust governance. We integrate advanced strategic planning with innovative logistical solutions and expert consultation to enhance project outcomes while adhering to sustainability principles. Our commitment to eco-friendly practices and ethical business conduct ensures that every project we undertake supports Saudi Arabia's goals for a sustainable future. By prioritizing environmental conservation, fostering social well-being, and upholding the highest standards of governance, Green Hub Company is dedicated to delivering exceptional, future-focused solutions that align with the Kingdom's vision for a resilient and sustainable economy.

Vision

To be the leading catalyst for sustainable transformation in the construction sector, advancing Saudi Arabia's Vision 2030 by delivering innovative, eco-friendly, and socially responsible solutions that foster a resilient and thriving future.

Mission

Our mission is to revolutionize the construction sector with a commitment to sustainability, excellence, and ethical practices. By providing cutting-edge project management, logistics, and consultancy services, we enhance project outcomes and advocate for environmental conservation and social responsibility. Aligned with Saudi Arabia's Vision 2030, we aim to deliver solutions reflecting our values of sustainability and integrity. We maximize shareholder value through innovation and efficiency, effectively managing risks and capitalizing on opportunities. Our capacity for handling complex projects establishes us as a key industry player, driving long-term growth and profitability while meeting the demand for sustainable construction.

01 Values

At Green Hub Company, we uphold integrity, quality, and social responsibility in every project. Our core values emphasize transparency and open communication, ensuring that client satisfaction is achieved through every stage. By focusing on these principles, we maintain business continuity and drive sustainability in all our endeavors.

02 Expertise

We combine deep expertise in engineering, economics, and project management, with over 15 years of experience in both the energy and construction sectors. Our team excels in translating complex visions into successful projects through cutting-edge design and adherence to top construction practices. This multidisciplinary approach, bolstered by our extensive industry experience, ensures precision, efficiency, and excellence in delivering impactful, sustainable solutions.

Service Offerings

01 Consultation

Offering expert advice, guidance, and solutions to organizations seeking to improve their operations, strategies, or performance. Consultants leverage their specialized knowledge and experience to address specific challenges and provide actionable recommendations.

02 Supply Chain management

Providing comprehensive resources including skilled manpower, advanced tools, and equipment to help companies achieve their goals efficiently. By addressing all constraints, we ensure optimal performance and successful outcomes tailored to each client's specific needs.

03 Projects Management

Availing comprehensive project oversight from initiation to completion, ensuring timelines, budgets, and quality standards are met.

Quality Standards

- **Quality Assurance**

Implement rigorous quality control measures to deliver projects that meet and exceed industry standards and client expectations.

- **Safety Protocols**

Prioritize the safety of both workers and occupants by adhering to strict safety regulations and implementing best practices on all construction sites.

- **Certifications**

Obtain and maintain relevant certifications and accreditations to showcase compliance with quality, environmental, and safety regulations in the industry.

Our Commitment

- **Client Satisfaction**

Our primary goal is to ensure client satisfaction by delivering exceptional service, open communication, and personalized attention to each project.

- **Sustainability Practices**

Commit to sustainable building practices and eco-friendly design solutions to contribute positively to the environment and community.

- **Continuous Improvement**

Strive for continuous learning and improvement, embracing innovation and technology advancements to enhance the value we bring to every project.

Our Portfolio

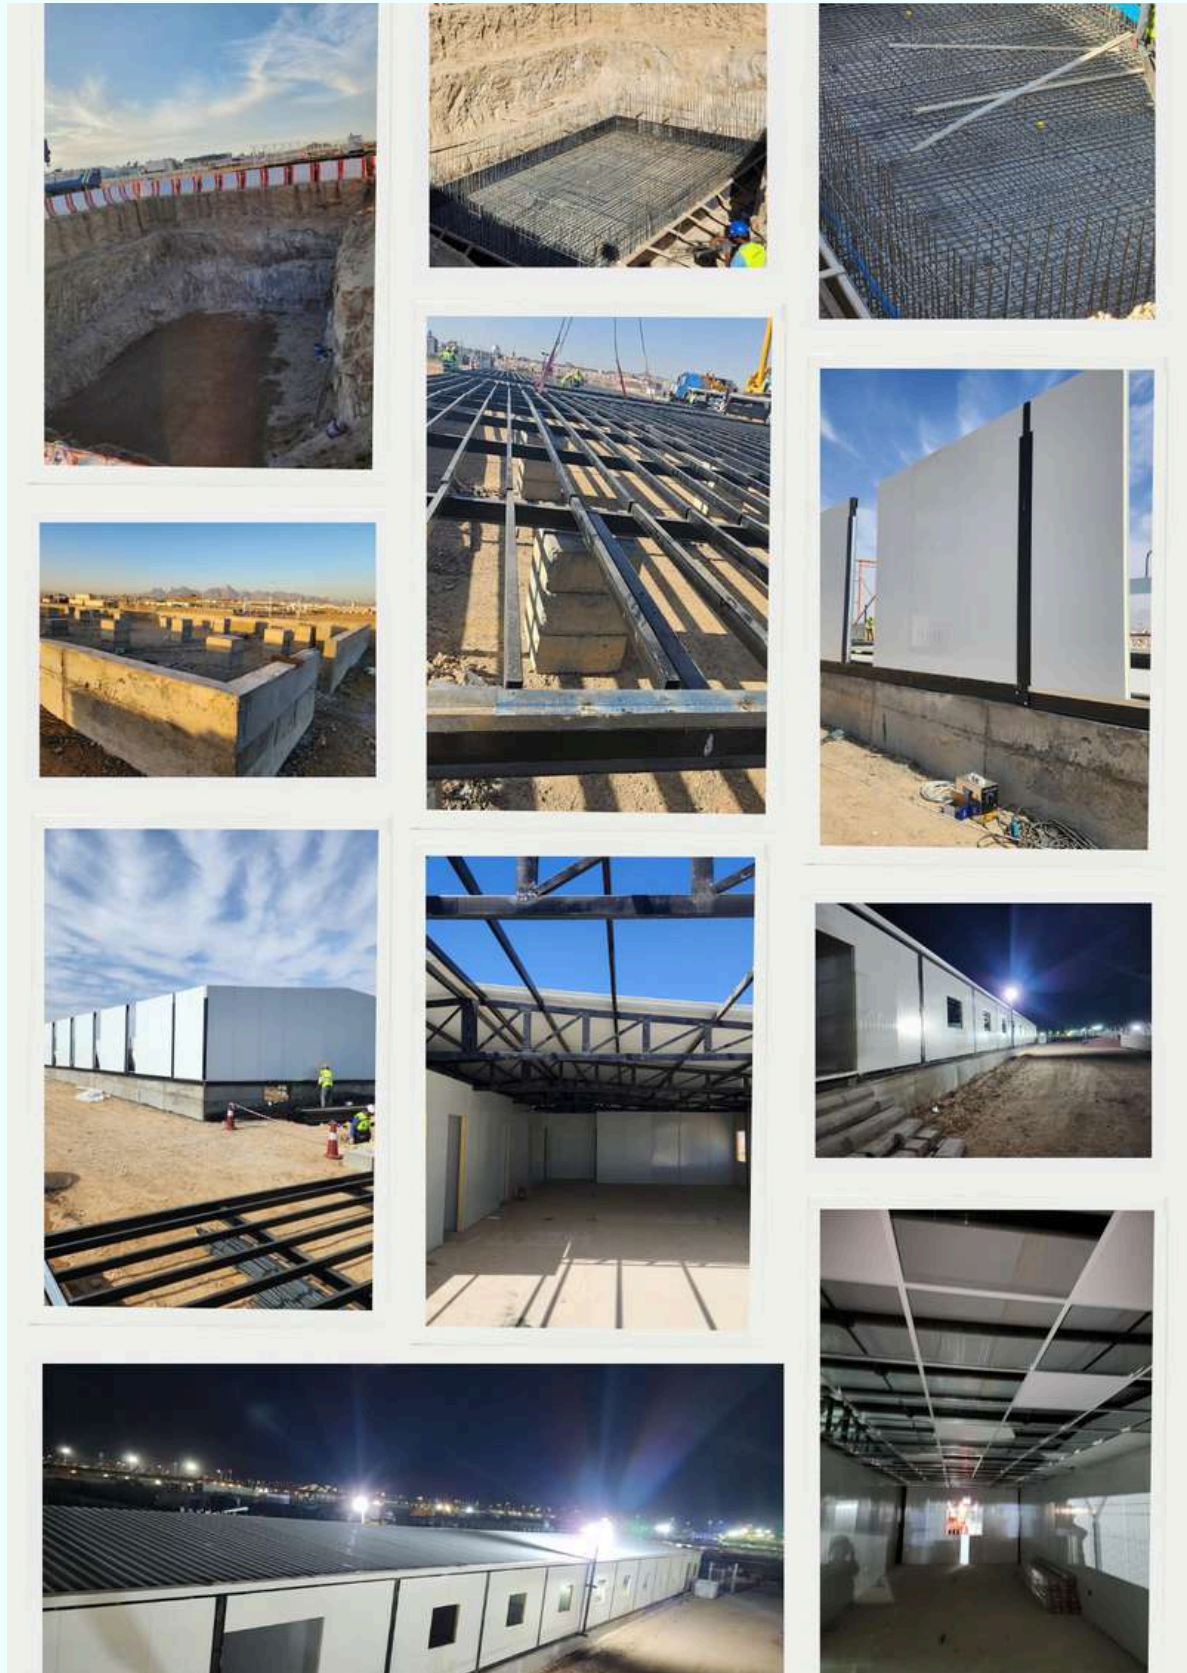

Construct an accommodation facility for SIBS company in Oxagon Project -Neom area with the goal of providing and installing: concrete foundations for the offices, dining moveable cabinets, and the main building with all finishing, including plumbing, mechanical, and electrical work, as well as ACs installation. In addition, provide and install portable cabinets. These will include concrete foundations for the offices with finishing (mechanical and electrical), air conditioning, curbstone and interlock surrounding the structure, restrooms, and a path with all earth, concrete, electrical, and plumbing work completed. Additionally, provide and build an underground septic tank that includes foundation construction, concrete walls, and excavation, along with an overflow warning system.

Include Electrical generators with main panels, MTS, and comprehensive maintenance services. Additionally, concrete bases with steel shading for storage and a volume capacity for a diesel tank and generators. as well as to install and supply SMDPs.

More Services

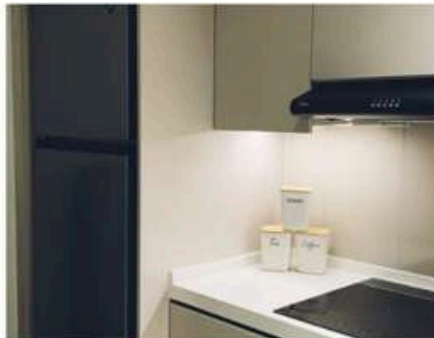

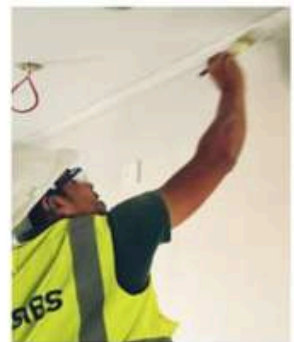

Finishing Services

A prime example of our expertise is our recent collaboration with a prestigious European company in the NEOM area. We successfully completed a major project involving painting, cleaning, and full finishing services for 1,200 units across 21 buildings. This project highlights our capacity to handle large-scale, complex tasks with precision and efficiency, reinforcing our reputation as a leader in the construction industry.

Finishing Works

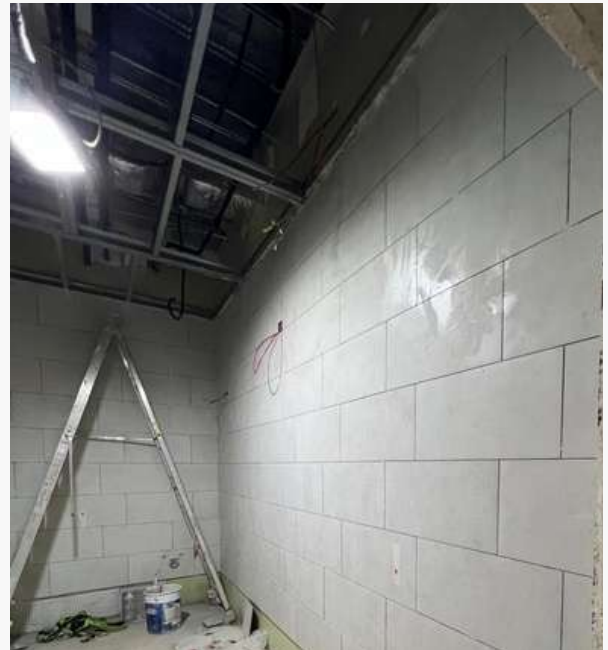

Finishing Services

تجربة
expertise

Our company was selected to carry out the finishing activities for the Sindalah project, in collaboration with Expertise Company as the main contractor. Our team was responsible for the precise installation of tiles on both floors and walls, grouting activities, epoxy application, vinyl installation, and carpet and door installation, contributing to the project's high standards of quality and design. This partnership ensured a smooth execution of the finishing phase, enhancing both the functionality and visual appeal of the development.

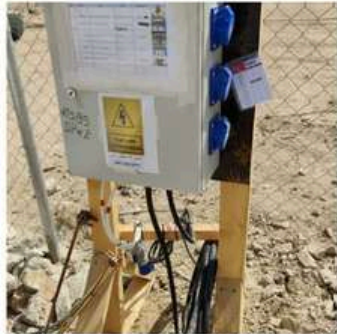

Masonry Work

Our team executed significant construction work in the Red Sea area-Amala region as part of the 4 Seasons Hotel project, under the main contractor, Shandong Tiejun Company. This included the installation of blocks for the hotel's structural framework, contributing to its overall development. Additionally, we undertook wall chasing activities in a separate building within the same project. Our expertise in these specialized tasks helped streamline construction progress and maintain high standards of craftsmanship throughout the project.

Products

Safety Compliance

Business Agent For HITEC In Saudi Arabia & GCC

We have partnered with HITEC Power Protection, a global leader in Dynamic Rotary UPS systems, to enhance power reliability and continuity for our clients. This advanced technology eliminates battery dependency, reducing maintenance costs and ensuring seamless operations in critical industries like data centers, healthcare, and manufacturing.

This collaboration strengthens our market position, drives business growth, and reinforces our commitment to delivering uninterrupted, high-performance power solutions for long-term success.

Business Agent For SIBS In Saudi Arabia & GCC

□ We have also partnered with SIBS (Scandinavian Industrialised Building Systems) to exclusively market their innovative industrialised construction solutions in Saudi Arabia and the GCC. SIBS combines automated design with an advanced production system, delivering up to 90% project completion before site arrival. This partnership allows us to promote a solution that significantly enhances efficiency, reduces costs and timelines, and upholds the highest standards of Scandinavian quality and sustainability. SIBS has already successfully completed two projects in Saudi Arabia, demonstrating the effectiveness and adaptability of their system in the region: SBC NEOM-Oxagon Area with 21 buildings and NC1 NEOM with 35 buildings.

Strategic Alliances

Furthermore, Green Hub Company, Elegant Homely Company, and Five Knights Company successfully worked together to generate mutual benefits and spur growth in their strategic alliance. To capitalize on the advantages of innovation, market expansion, and operational efficiency through: innovation and idea generation, market expansion, resource sharing, cost savings, and competitive advantages, the alliance established clear objectives and established metrics to track its progress. Additionally, a comprehensive action plan was developed, detailing the precise actions, roles, and deadlines for achieving future growth and expansion.
